imaging excellence from

 **CANFIELD**

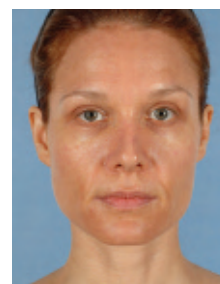

IntelliStudio™

*ideal for high-quality,
repeatable patient imaging—
facial shots to full body*

The **Canfield IntelliStudio** brings studio quality and mobile convenience to your patient imaging for treatments such as mesotherapy, sclerotherapy, photodamage, body contouring, hair removal, psoriasis, etc. With three IntelliFlash units calibrated and balanced for skin imaging, the IntelliStudio makes taking high quality studio images practical anywhere in your practice—just position and shoot. And when you use Mirror® software, you can capture directly into the patient chart with full control over the camera.

oblique, 1:20

IntelliFlash heads move vertically with the camera to keep the light where you need it.

The **Canfield IntelliStudio** features a sturdy twin-beam stand, three IntelliFlash™ heads calibrated and balanced for skin imaging, a counter-balanced camera mount, and locking caster base. The flash units move vertically with the camera and provide the cross illumination needed to reveal form and surface structure. Included with the IntelliStudio are a deluxe backdrop and indexed posing mat.

System shown at left with optional laptop and arm.

Laptop arm..... \$350

Dell laptop..... \$1,500

IntelliStudio Aesthetic Simulation Solution \$12,950

Image Capture Station

Whether you're upgrading an existing photo studio or building a new one, camera handling can make all the difference. You need fast and easy positioning to get the right view pre-op, and accurate repositioning to match it in the post-op session. And for that, nothing matches the Canfield Image Capture Station.

With a sturdy aluminum frame and ball bearing-mounted casters, the **Image Capture Station** glides easily into position, while the camera rides smoothly on the precision counterbalanced cross-carriage for effortless height adjustment. When in position, the entire system locks down to assure precise, repeatable image capture.

Industry-standard Mirror® software adds image capture and management tools to your solution, including MatchPose for perfectly registered before-and-after images. Add the optional laptop and arm and your image capture solution is complete . . . with an elegant, professional appearance.
